SUMMARY

I began learning HTML and JavaScript on my own through **FreeCodeCamp** in 2019. However, I faced many obstacles along the way and found myself getting stuck frequently. Despite these challenges, I continued to learn through self-teaching and practice until I joined **Alterra Academy's** bootcamp. where I learned *React* and *TypeScript* in addition to *HTML* and *JavaScript*. During my time there, my skills grew rapidly, and I worked on several individual and collaborative projects that further honed my abilities. Currently, I am seeking a Frontend Engineer position with a company where I can utilize my skills and continue to develop both professionally and personally.

TECHNICAL SKILLS

- Languages : Javascript, Typescript, HTML, CSS.
- Technologies : React, NextJs, TailwindCSS, DaisyUI, Redux, Bootstrap, FramerMotion.
- Other : Algorithm, Problem Solving, CRUD API.

PROJECTS

- **Lapak-UMKM**
  LapakUMKM is a platform designed to assist micro, small, and medium-sized businesses (MSMEs) in Indonesia with marketing their products online. This platform connects customers with local products from various regions of Indonesia and supports business owners by providing a new sales channel to reach a wider audience. See the source on Github for detail.
- **Escapist**
  Escapist is a web app marketplace for homestays and short-term experiences. We built this website with TypeScript framework React and other tools like Redux and DaisyUI also deploy with Netlify. We were inspired by Airbnb but with our own sense of design. See the source on Github for detail.
- **Alta Dashboard**
  Alta Dashboard is an online reporting website dashboard that manages data simulations, classes, users & mentors from Alterra Academy. We build this website with library TypeScript React-Vite and other tools like Redux and DaisyUI. See the source on Github for detail.

- **MovieApp**
  MovieApp helps people to search for the movie they are curious about. We could see a list of various movies, see the detail of the movie. See the source on Github for detail.

EDUCATION

ALTERRA ACADEMY   **Januari 2023 – April 2023**
Immersive Program, Frontend Engineering

- Immersive Program Frontend Engineering is an intensive 3 months program designed to train future frontend engineers in the fundamentals of software development.
- This rigorous 60 - 70hr/week program has a well-documented history of developing top notch software engineers.
- Course: Pair Programming, HTML/CSS, Git, Github, Gitflow, Javascript, Typescript, ReactJS, Redux, DaisyUI, TailwindCSS
- Capstone Project: Building E-commerce Lapak-UMKM

CERTIFICATIONS

- Has successfully completed the freeCodeCamp.org (JavaScript Algorithms and Data Structures)
- Has successfully completed the freeCodeCamp.org (Responsive Web Design)
- Has Successfully passed the English Training in Kampung Inggris Global English Pare (Issued by Global English Kampung Inggris August 2019)

LANGUAGE

- Bahasa (Native)
- English (Limited working proficiency)

INTERESTS

- Passionate about frontend development and continuously seeking to learn new technologies and tools to enhance my skills.
- Particularly interested in frameworks like React and Next.js, and excited about their potential to build robust and scalable web applications.
- Enthusiastic about outdoor activities, including hiking and camping, to stay active and connect with nature.
- Exploring new skills and knowledge through online courses and tutorials.
